Applicant's election without traverse of group I, claims 1-3 and 27-29 in Paper No. 8 is acknowledged.

Regarding the restriction requirement, a species was requested in the event claim 26 was elected applicant would know to also supply a species. Claims 4 and 5 are compounds and are therefore part of group II. The omission is regretted.

Claims 4-26 are held withdrawn as being directed to nonelected subject matter. 37 CFR 1.42(b). It is suggested that the nonelected subject matter be cancelled.

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 27-29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims directed to use have been held to be non-statutory. Note *Clinical Products v. Brenner* 149 USPQ 475.

The prior art of record does not teach or fairly suggest the claimed invention. For example, Laidley et al teach the inhibitory activity of cantharidin analogues against protein phosphatase 2a. See abstract. However, the compound is not anhydride modified as is the compound of the claimed invention. See page 6 lines 14-17 of the specification where the modification is described. Likewise, see Walter. See abstract and structures in column 1. *Claims 1-3 are allowed.*
